

HLE-V2

DOG-CHANGE CONVERSION KIT

- The gearbox kit is designed to convert standard Mitsubishi Lancer EVO 4-9, 5 speed transmissions, to dog change.
- No modification is required to the standard cases.
- The gearbox kit includes 5-forward ratios, reverse, custom short shift selector rods, selector forks and a profile ground ring and pinion.
- An extensive range of gear ratios are available.
- Optional non-standard clutch splines and input shaft lengths are available to customer specifications.
- Case hardened, nickel chrome steel is used for all the gears and shafts.
- Heat treated and nitrided, high tensile steel is used for the selector forks.
- The kit is available with optional profile ground gears, for increased efficiency and durability.
